

## Support with headrest and seat belts

### DESCRIPTION

The BPH device was created to guarantee total safety of the wheelchair passenger, even in the case of rear-ending.

It consists of a support of excellent design and sturdiness, in which we find the housing for the 3-point seat belt with retractor and padded headrest.

The BPH can be installed on a quick-release foot or on a special guide in order to be present in all vehicles for transporting the disabled.

### BENEFITS

- Excellent sliding of the 3-point seat belt with retractor
- Total protection in case of an accident
- Easy to use
- Possibility of both left-hand and right-hand configuration
- 180° rotating headrest
- Headrest sliding sideways 130 mm
- Tested for the dissipation of energy caused by front and rear impact
